

Roxel Transit Designer™

Online tool for easy design of cable and pipe transits

The free, web-based application Roxel Transit Designer™ is ideal for design engineers using the Roxel sealing system. It simplifies product selection according to needs and requirements and improves the entire process of designing, purchasing and installing transits.

Improve global collaboration

You can securely share your work online and set up collaboration with project teams anywhere in the world. Roxel experts are there to support you in your language through the chat function. If you need help, just share the project with us and we will return the completed documents to you.

Benefits

- Find the right solution according to your needs
- Copy and paste your cable or pipe schedule inputs
- Get manufacturer-approved engineering outputs
- Reduce design time

“By importing data into the Roxtec software, we saved several weeks – if not months.”

Gary Jennings, Lead Electrical Designer of Wood Group

Smart engineering tool

You can design hundreds of multi-cable and pipe transits in minutes. Enter your input and let the tool guide you through a simple process, including a filter for selecting the right solution. Thanks to the manufacturer-approved output you can directly generate full documentation and ensure an efficient handover to procurement teams, onsite installers and maintenance teams.

Simple user input:

- Cable/pipe schedule or estimates
- Sealing/certification requirements
- Installation preferences
- Preliminary opening sizes
- Material quality selection

Automatically generated output:

- 2D drawings in DXF and PDF
- 3D STEP
- Bill of material in Excel
- Installation instructions
- Certificates
