

ADTP

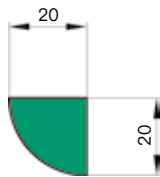

Für den Einsatz der Pack- und Füllmodule in Radienrahmen sind Radienadapter erforderlich. Sie ermöglichen die Verwendung der Standard-Modulgrößen und optimieren somit die Leitungsbelegung.

Radius adapters are needed when using packing and filling modules in radius frames. They make it possible to use the standard module block sizes and thus optimize cable / pipe occupancy.

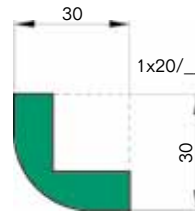

- Bestehen aus halogenfreiem Material
- Details zur Montage/ Anwendung aus entsprechenden Zertifikaten entnehmen

- Made of halogen-free material
- Detailed information about installation and use may be found in the corresponding certificates
